SIP Certified WINERY & VINEYARDS

Being SIP Certified goes beyond winemaking & shows our dedication to the 3 P's of Sustainability – People, Planet, Prosperity. We are committed to ensuring that both natural and human resources are protected.

How Does SIP Compare?

When choosing a certification program to validate the practices that we already had in place, we reached out to the SIP Team over other agencies because they adhere to a strict audit system based on practice and performance. Not every requirement is measurable and not every grower can qualify. We choose

We currently farm over 200 acres of SIP Certified Vineyards & craft all our wines in our SIP Certified Winery. A few specifics that set us apart:

- *Solar Powered Tasting Room, Restaurant & Winery*
- *Industry Leading Water Reclamation System*
- *Rooftop Rainwater Collection System*
- *LEED Certified Winery*

in 2016 we became the first ever SIP Certified Winery & Vineyard! Check out our new logo
